

Aging Adult Monitor

Wireframes

I created five wireframes from user flows and one extra wireframe:

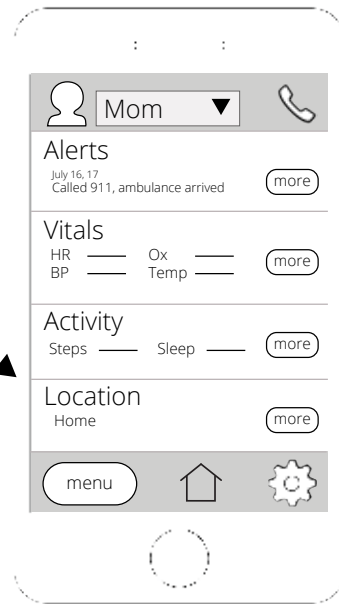

- View mom's current location
- View mom's heart rate for the past week
- View mom's health history - surgeries
- Add a new medication
- View mom's recent emergency alerts
- Configure User

User Flow 1 - View mom's current location

Home page

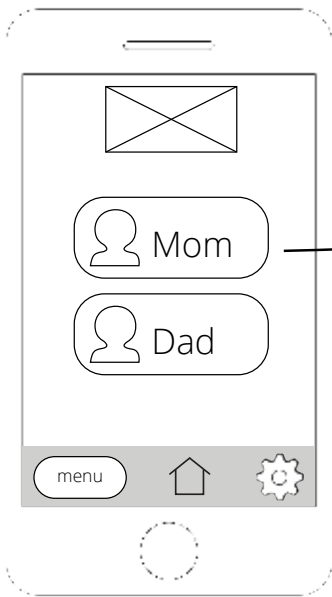

Assuming the user has already logged in as the user will log in once when they install the app.

Mom's dashboard

The dashboard always shows a summary of current data including the current location.

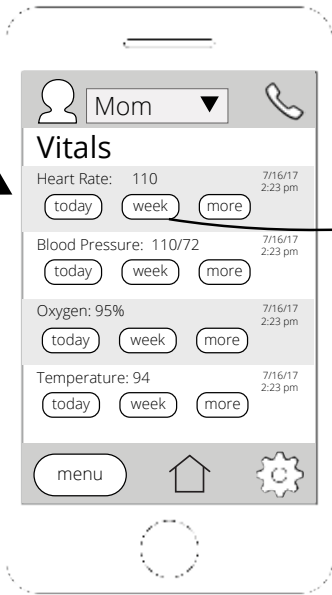

User Flow 2 - View mom's heart rate for the past week

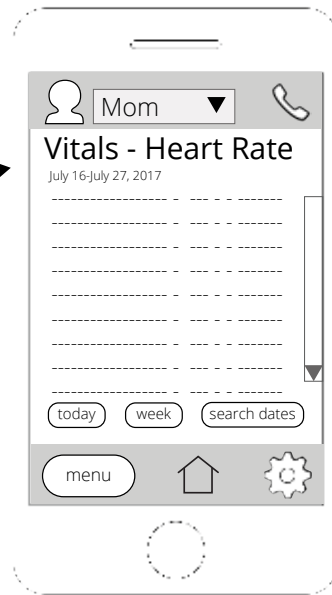

Home page

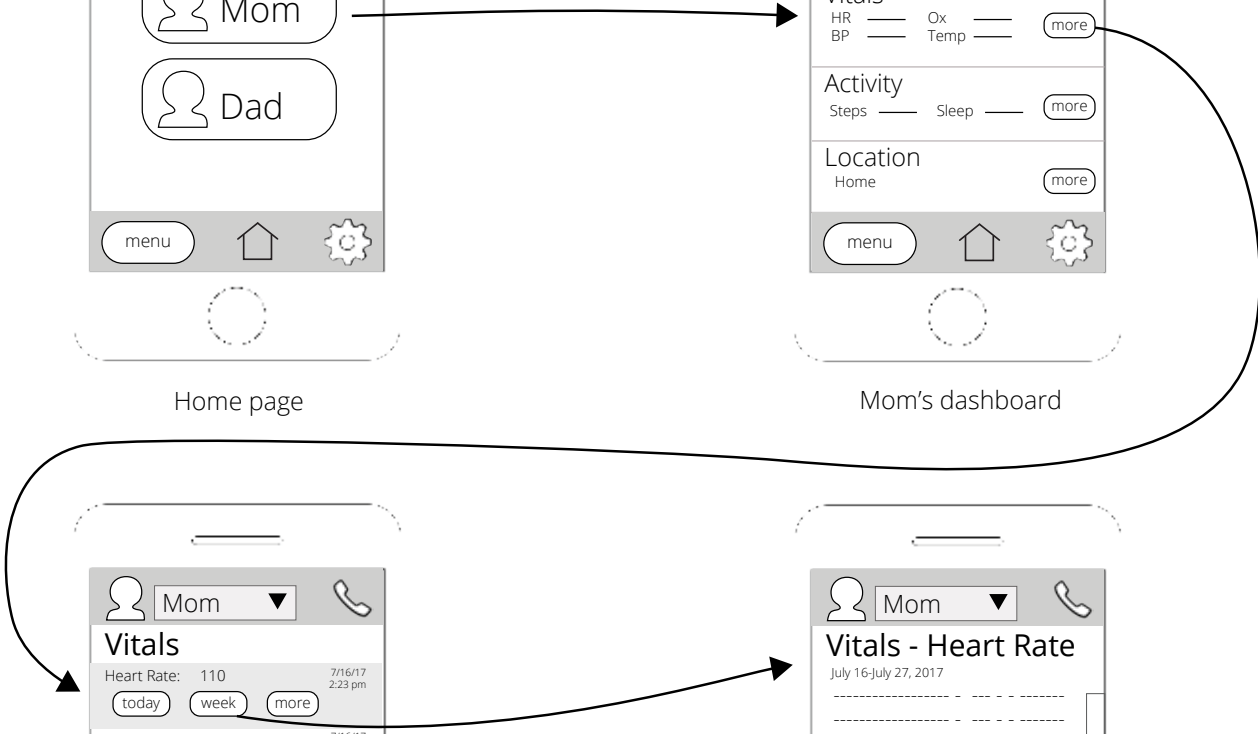

Mom's dashboard

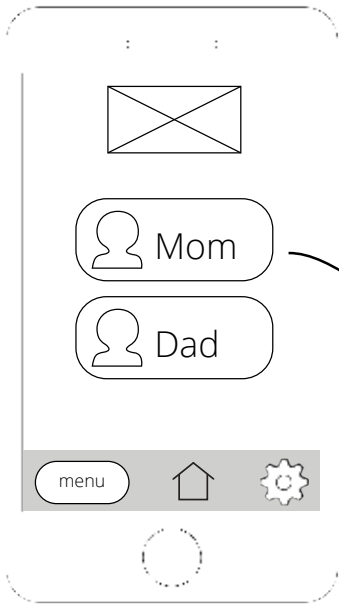

Mom's vitals page

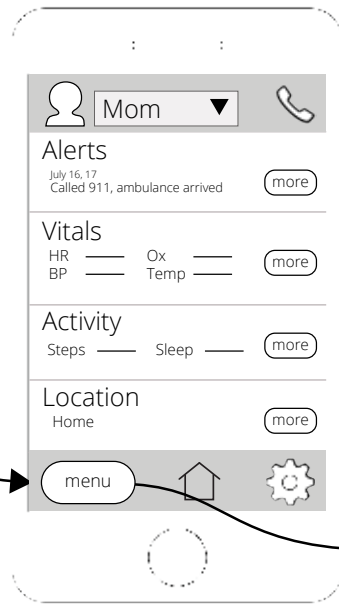

Mom's heart rate - past week

User Flow 3 - View mom's health history - surgeries

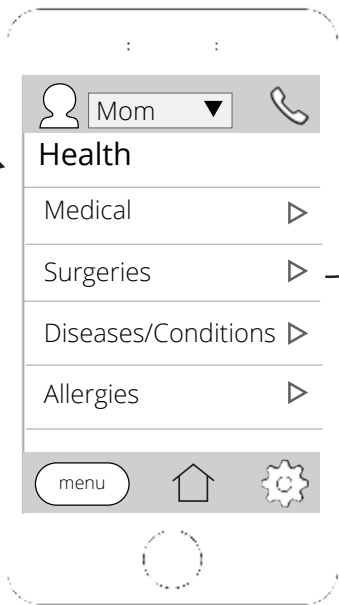

Home page

Mom's dashboard

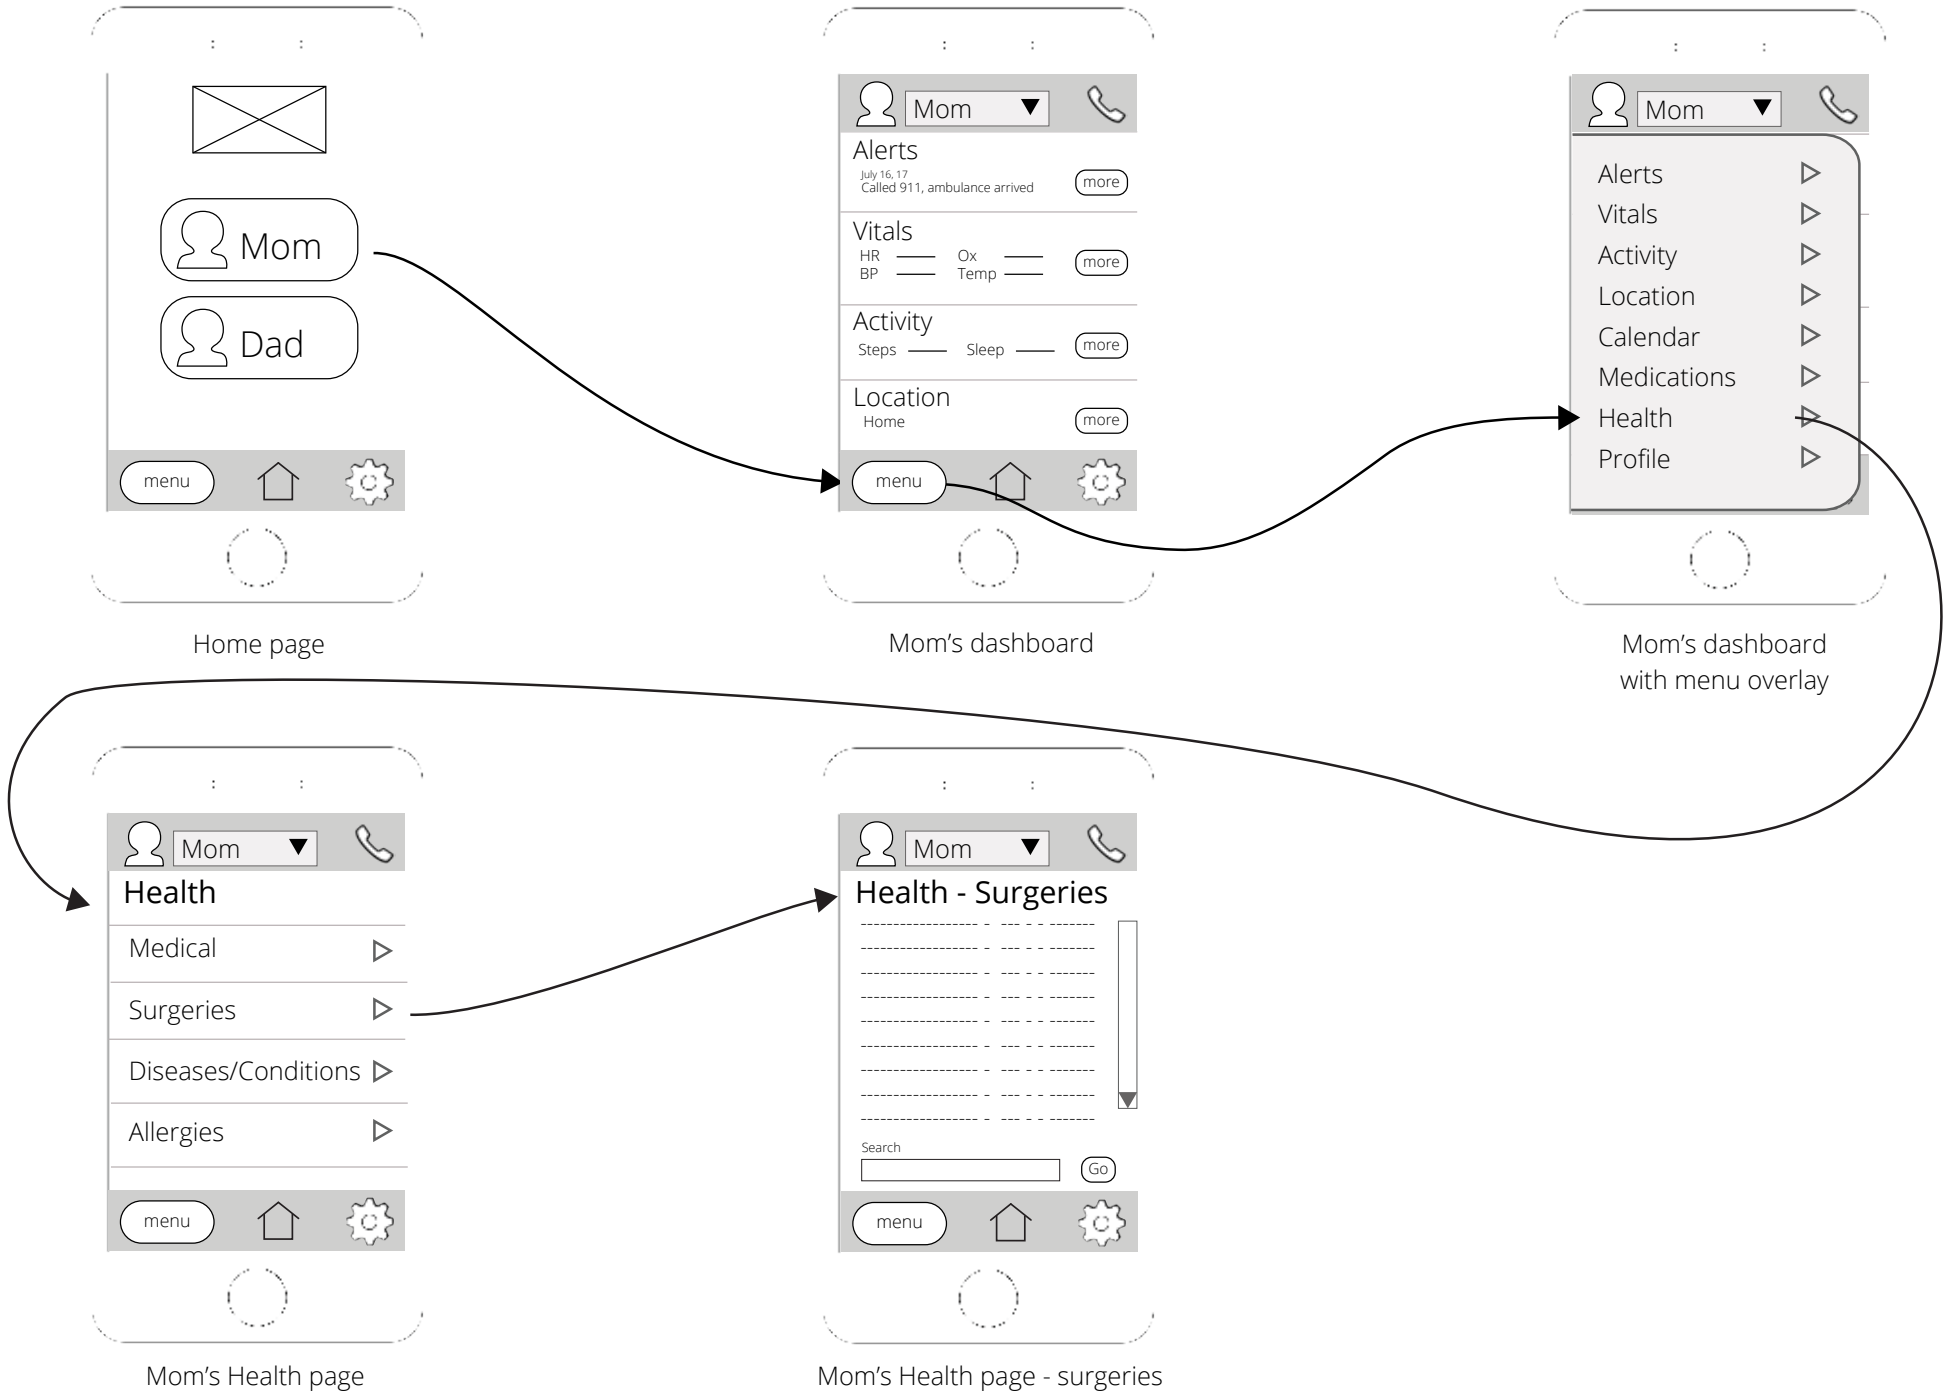

Mom's dashboard with menu overlay

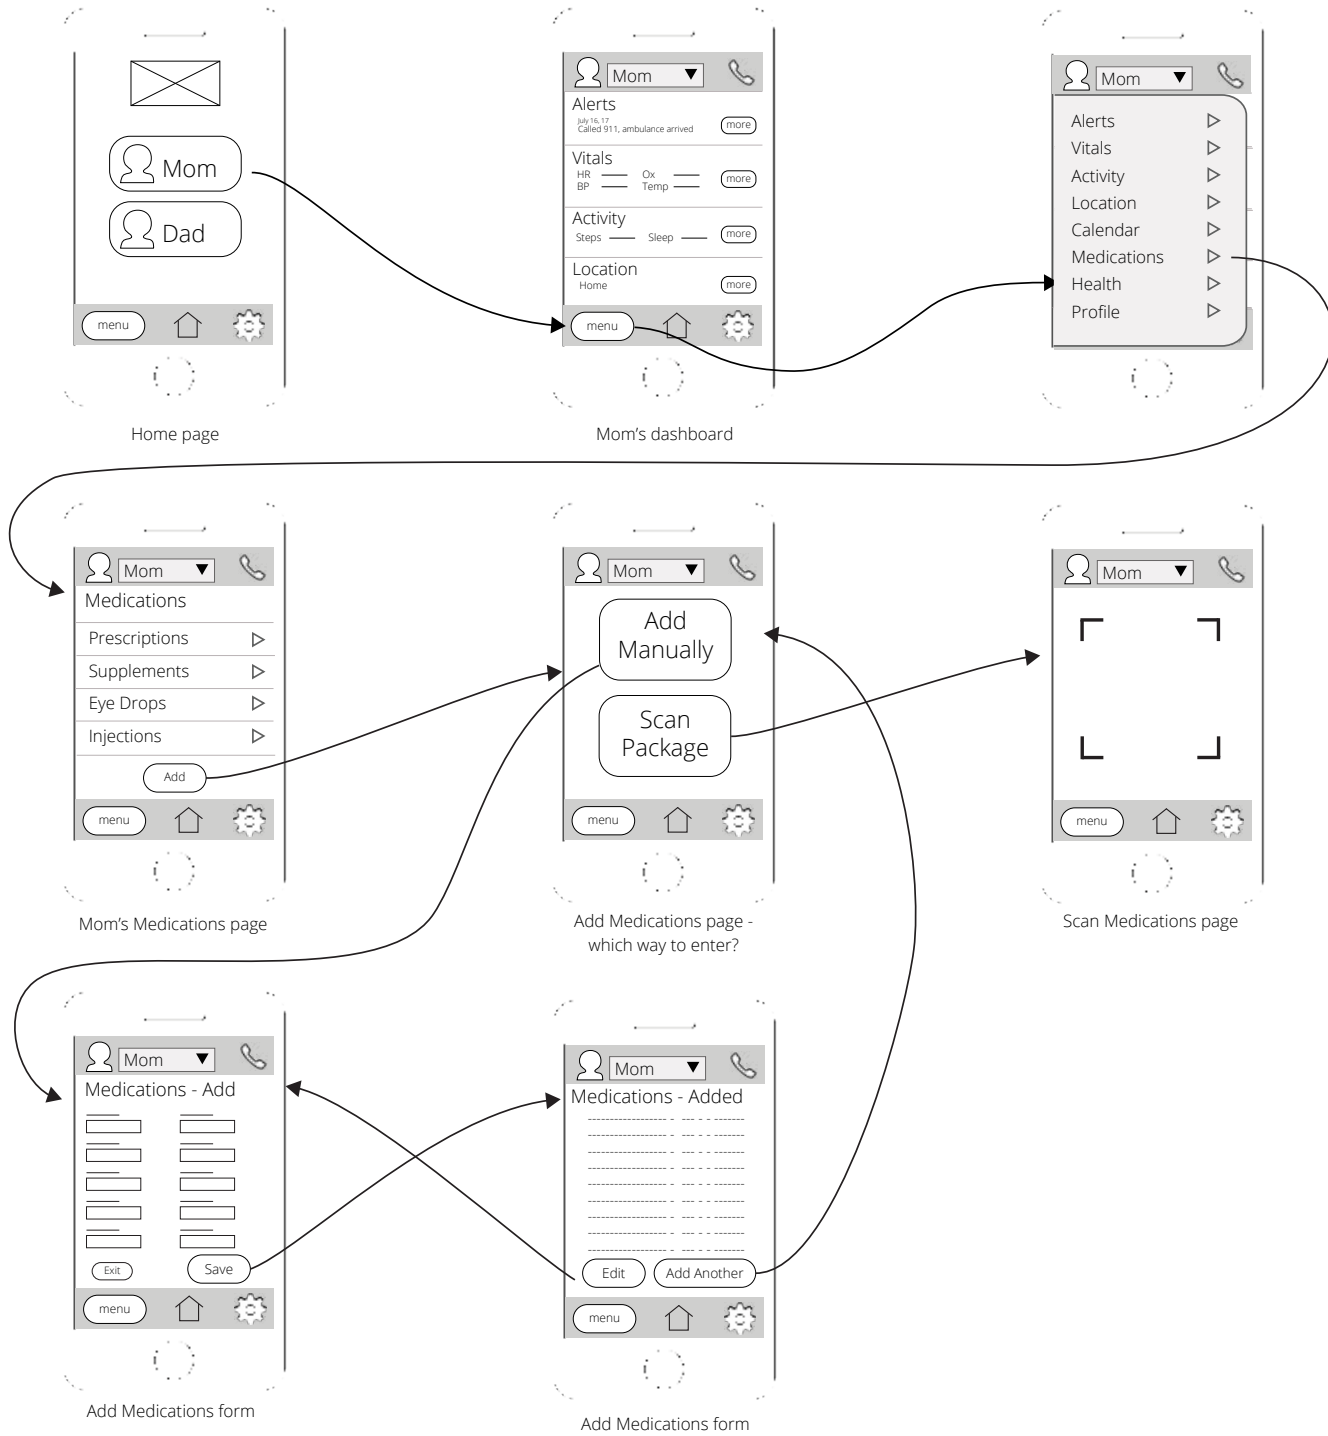

Mom's Health page

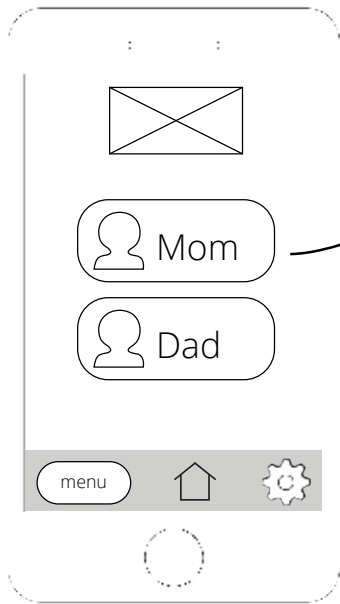

Mom's Health page - surgeries

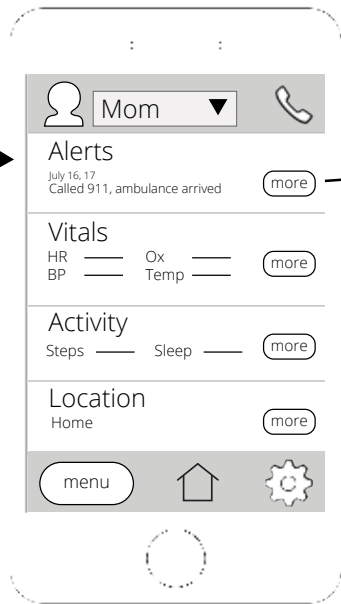

User Flow 4 - Add a new medication

User Flow 5 - View mom's recent emergency alerts

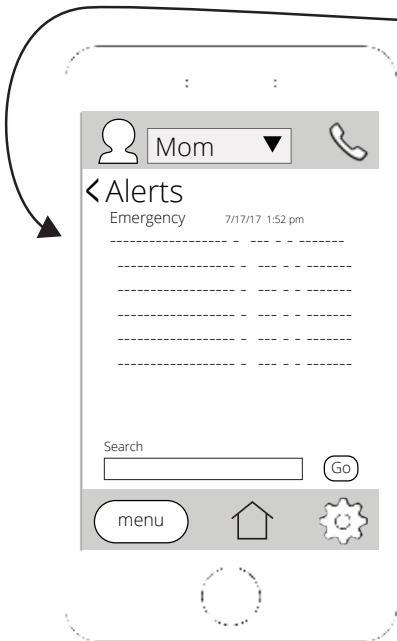

Home page

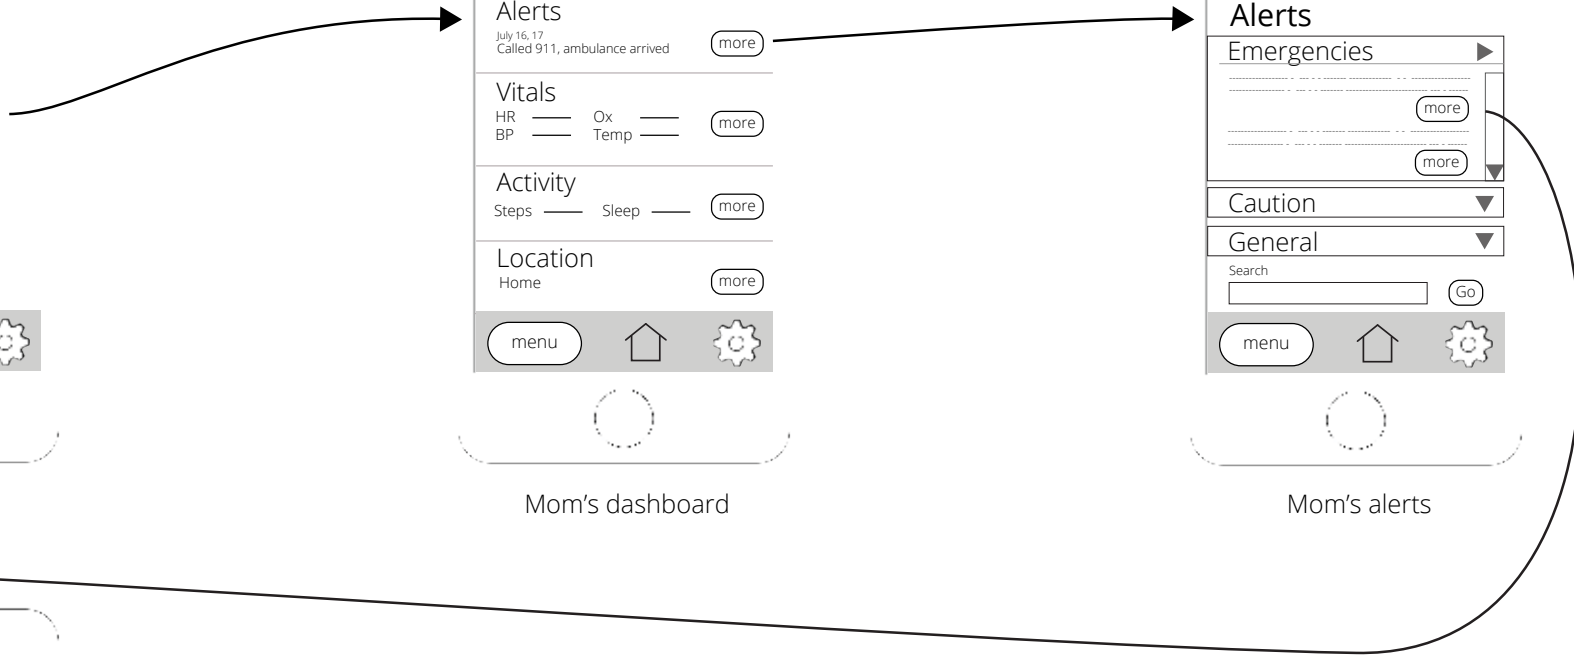

Mom's dashboard

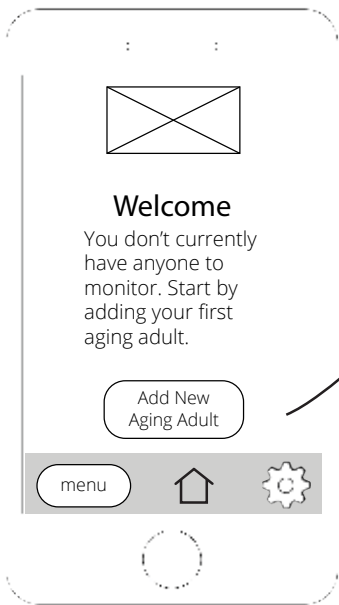

Mom's alerts

Mom's alerts

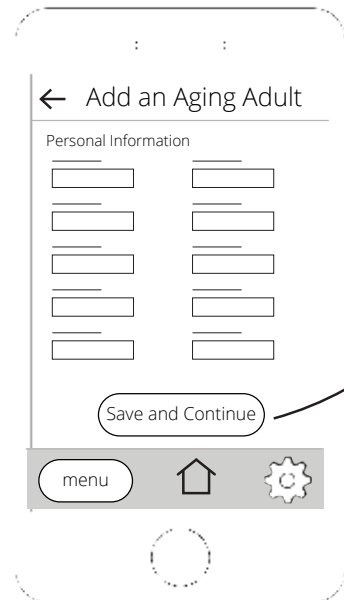

User Flow 6 - Configure User

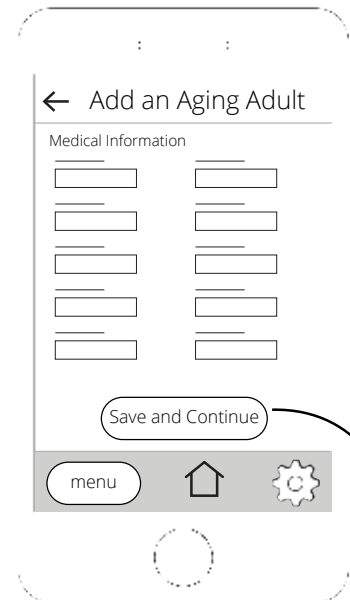

Home page

Assuming the user has already logged in as the user will log in once when they install the app.

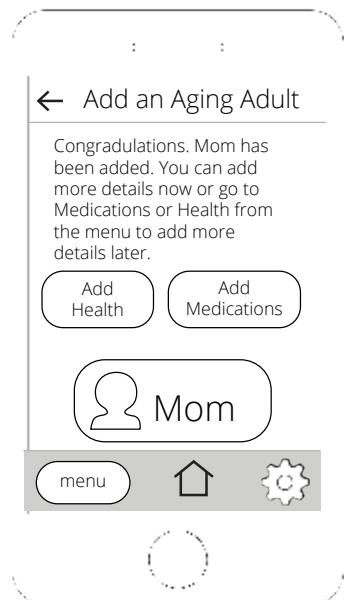

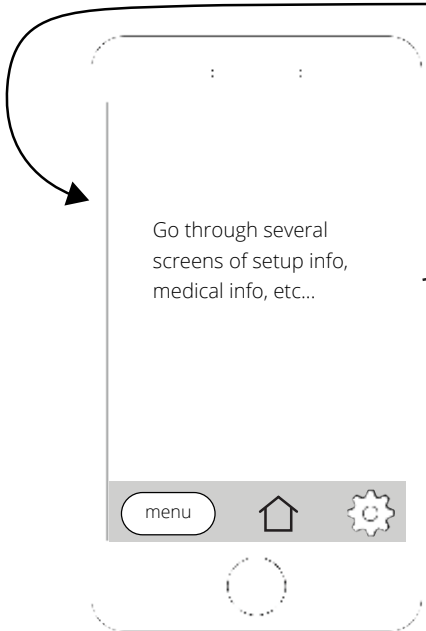

Add an Aging Adult Personal Information

Add an Aging Adult Medical Information

It will take several screens to add all of the appropriate information.

Go through several screens of setup info, medical info, etc...

Add an Aging Adult

Congradulations. Mom has been added. You can add more details now or go to Medications or Health from the menu to add more details later.

Add Health Add Medications
